B5 Biofuel Home Heating Oil & Diesel • Energy Efficient Upgrades • Solar
Geothermal • Radiant Floor Heating • Wood Pellet Boilers & Bulk Pellet Delivery

Greetings,

It's that time of year again! Spring is in the air and most people don't want to even think about next year's heating season. But if you plan accordingly, you could hopefully save money which is why we create yearly contracts per our customer's requests. Last year Fixed Price customers saved on average **\$.52 per gallon!**

In thinking about our past heating season, everyone at Pine State wants to thank you for making a difference. Thanks to your support, last year we offset over 42,500 gallons of foreign produced oil. We are proud to only offer Bioheat heating oil. Bioheat is kind to Mother Earth, your heating system and your wallet! If every American household using heating oil used B5 heating oil like you did, we would be reducing our nations petroleum consumption by up to 500 million gallons per year- that's equivalent to about 700,000 cars being taken off the road! This would be a big step towards conserving oil, and reducing greenhouse gas emissions. We highly encourage you to visit our website at www.pinestateenergy.com to learn more about the benefits of Bioheat heating oil.

One of our goals in going green is to save more paper. One way we can achieve this is to eventually convert to a paperless system. We would be delighted if you could assist us in facilitating this change by submitting your email. You may log on to our website and submit your email on our home page, fax it, Email it to info@pinestateservices.com or simply call it in. To reward you for your "Green" efforts, we will enter your email into a random drawing to win dinner for two! One winner will be chosen on April 30, 2010.

Enclosed with this letter you'll find our 2010/2011 heating oil contract along with our Credit Card Authorization, Site & History and Energy Service Contract forms. The Energy Service Contract is a special offer for the maintenance and service of your heating system and is priced especially for our Oil Contract customers.

Please review the contracts and give one of our Customer Service Representatives a call should you have any questions. We would be happy to discuss these options with you.

Sincerely,

Your Pine State Energy Team

The figures below will help you determine your needs for next year's heating season.

Your household used _____ gallons of B5 heating oil between the months of May 2009 until April 2010. By using our B5 heating oil your household helped offset _____ gallons of traditional oil thus reducing the effects of global warming and our dependence on foreign oil. *Thank you.*
